ABOUT THIS NEW WORK

INTERNATIONAL COLLABORATION

Of Fish Dreaming is an international Collaboration Project between Christina Chan (Singapore) and Aymeric Bichon (France) and their collective dancemeasheep.

Supported by the Singapore National Arts Council's creation grant, the work consists of a full-length live performance duet and a companion short film to the work entitled Blue Portal.

A FANTASY CONTEMPORARY DANCE WORK

It is set in a dream that reflects on life. Through a series of surrealistic dream states, both abstract and literal and of the individual and the greater dreams of man, we begin to contemplate what it means to live fully or be fully present in the moment.

Casting light on the jarring and serene, absurd and beautiful, comforting and challenging, trivial and important, it is a journey to find one's self.
